

Exercise: Simple A-frame example

2024-05-23

Phillip G. Bradford

Goal: update text and position of text on Laptop and see effects in VR glasses

Exercise

This example is running A-frame from a basic HTML file – good to start with **not-index.html**

1. In a web-browser such as google-chrome
2. Select <CTRL>-o, then open the file simple-sky.html
3. Move the scene around using the mouse-arrow
4. Update the text in simple-sky.html and save
5. Refresh the file simple-sky.html in the browser
 - a. Verify the image has been updated in your phone using the VR glasses
6. Change the a-text position values
 - a. Do one at a time – change them by small increments such as 1 or 2; In the case of z update by 5 or 10.
 - b. Use VR glasses to view the scene given these changes
