Exercise: Forrest image

2024-01-08

Phillip G. Bradford

Goal: use **a-scene**, **a-sky** tags and basic geometric objects and a static image

Exercise

Find an alternative (free and public-domain) image like the forest image or nebula image showing <a-scene>...</a-scene>, <a-sky>...</a-sky> and <a-text>...</a-text>

1. Find a free and public domain 2D image (most images are 2D). Or you may use the forest image in this repo
   a. For example: https://images.google.com/
2. Download an image to your laptop
3. Upload the image into your project in glitch
4. Get glitch-assigned URL to the image you just uploaded and point src="glitch-url" in <a-sky>...</a-sky> component of "forest.html"
5. Update the words in <a-text>...</a-text>
6. Work with the screen from <CTRL>-<ALT>-I on Windows and <CMD>-<OPTION>-I on MacOS
7. On the phone instance of your short-git repository, click the new glitch URL
8. Use VR glasses to view the scene
